erable activity in the Chief district this fall. A number of Portland, Ore, people have invested in there and are working their properties. Messrs, Wescoe, Gordon and others are also developing their ground, and all with gratifying results. In addition to the predominating silver-lead ores considerable gold is found in some of the Chief district ores. There are several rons deposits in the vicinity, and it is expected that in time these will be found to be the capings of commercial ore bodies,

Messrs, Shemwell and Williams expect to return to the mine today or tomorrow.

The Josephine Consolidated is sinking a ninety-foot shaft and sending out a drift to open up a vein on which the surface showing runs from \$\$ to \$22 to the ton. This drift will give 100 feet depth on this vein. In about twenty feet more the drift should catch the vein, when a large body of fine ore is anticipated.

Light mining is being done on the Camp Bird property. Considerable prospecting is being done over the property with a view to asceptaining the most advantageous place to begin permanent operations. Surface indications are fine on this property and a little depth will undoubtedly make good.

Considerable Activity.

Mr. Shemwell says there is considerable activity in the Chief district

Extent of Workings.

In the Oregon group a 200-foot shaft to 20 feet wide, traced on the surface by outcrops. This shaft is connected with a tunnel 300 feet long. A second tunnel below this is in 200 feet, and there is a third tunnel 300 feet long. All this the doctor regards as mere prospecting work, and that they nave not even begun to mine yet. In process of sinking the shaft, a few tons of good ore were taken out and are now in the ore house. On this part of the property, there is a good good other necessary machinery.
